

=====
VK3DVision - A Vulkan Driver made by Helifax for Stereo3D in Vulkan API.
[www.http://3dsurroundgaming.com/](http://3dsurroundgaming.com/)
=====

Version 1.0.1 of Vk3DVision.

=====

Setup:

=====

- First make sure you run your Vulkan game/app in Borderless Mode! Never run it in EXCLUSIVE_FULLSCREEN!
- Always disable GFX options that have to do with Temporal AA or temporal effects (you can fix them later).

!!! For Nvidia 3D Vision:

- Make sure the in-game resolution matches your Windows Desktop Resolution!
- Make sure you enable Fullscreen support in "Vk3DVision.ini".

=====

Documentation:

=====

Please watch the video documentation here, on how to get running and start fixing your game: <http://3dsurroundgaming.com/Vk3DVisionDocs.html>
